IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

- Read and understand all instructions. 2. Follow all warnings and instructions marked on the product.
- 3. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning
- 4. Do not use this product near water (for example, near a bath tub, kitchen sink, or swimming
- 5. Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.
- 6. Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect it from overheating, these openings must not be blocked by placing the product on the bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in-installation where proper ventilation is not provided.
- 7. This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your dealer or local power company
- 8. Do not allow anything to rest on the power cord. Do not locate this product where the cord will
- 9. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product.
- 10. To reduce the risk of electric shock, do not disassemble this product. If service or repair work is required, contact VTech Customer Service at 1-800-595-9511. Opening or removing cabinet parts other than specified access doors may expose you to dangerous voltages or other risks. Incorrect reassembling can cause electric shock when the appliance is subsequently used.
- 11. Do not overload wall outlets and extension cords as this can result in the risk of fire or electric
- 12. Unplug this product from the wall outlet:

GETTING STARTED

Setting Up Your VT1411

- 1. Choose an area near an electrical outlet and a telephone wall jack.
- 2. Plug the AC power adapter into an electrical outlet and the DC connector to the back of the

CAUTION: Use only the AC adapter shipped with your VT1411. It is specifically designed for this product

Connect power to the base unit before placing the Belt Pack in the cradle.

- 3. CHARGETHE BELT PACK BATTERY PACK BEFORE USE. To ensure the Belt Pack is recharged properly, make sure the belt clip is attached and the tip of the clip is inserted in the slot above charge contacts. The batteries recharge automatically whenever the Belt Pack is in the base unit cradle. The batteries must be charged for 16 hours before using your phone for the first time.
- 4. Connect the telephone line cord. Insert one end of the telephone line cord into the jack at the rear of the base unit. Plug the other end into a telephone wall jack. Make sure the plugs snap
- 5. CHECK FOR A DIAL TONE. After the battery pack is charged, put on the attached Headset

INTRODUCTION

Parts Check List:

- Belt Pack
- Base Unit Telephone line cord
- Headset AC adapter
- **Battery Pack** Belt Clip

If the Belt Pack is in use (off hock) when **PAGE** is pressed on the Base Unit, the Belt Pack will emit one page alert. If the Belt Pack is not in use (on hook), the page alert will continue for approximately 60 seconds. This feature is useful in locating a

misplaced Belt Pack.

This equipment complies with FCC AND IC REGULATIONS 15 and 68 of the Federal Communications Commission (FCC) rules for the United States. It also complies with regulations RSS-210 and CS-03 of Industry Canada (IC).

A label is located on the underside of the base unit containing either the FCC registration number and Ringer Equivalence Number (REN) or the IC registration number and Load Number. You must, upon request, provide this information to your local telephone company.

This equipment is compatible with inductively coupled hearing aids

FCC AND IC REGULATIONS

FCC Part 15

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The equipment has been tested and found to comply with part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation This equipment generates, uses and can radiate radio frequenc energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try and correct the interference by one or more of the following measures:

- · Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receive Connect the equipment into an outlet or on a circuit different from that to which the receiver is connected.
- · Consult the dealer or an experienced radio/TV technician for

FCC Part 68

The FCC requires that you connect your cordless telephone to the nationwide telephone network through a modular telephone jack (USOC RJ11C or RJ11W)

Your telephone company may discontinue your service if your equipment causes harm to the telephone network. They will notify you in advance of disconnection, if possible. During notification you will be informed of your right to file a complaint with the FCC

If it is determined that your telephone equipment is malfunctioning the FCC requires that it not be used and that it be unplugged from the modular jack until the problem has been corrected. Repairs to this telephone equipment can only be made by the manufacturer or its authorized agents or by others who may be authorized by the FCC. For repair procedures, follow the instructions outlined under the VTECH

The REN is useful in determining the number of devices you may connect to your telephone line and still enable the devices to ring when you receive a call. The general rule is that the REN value should not exceed 5.0 total; however, contact your local telephone company for the specific number in your area.

IC (Industry Canada)

The Industry Canada label identifies certified equipment This certification means that the equipment meets certain telecommunications network, protective, operational and safety requirements. Industry Canada does not guarantee the equipment will operate to the user's satisfaction

Before installing this equipment, users should ensure that it is permissible to be connected to the facilities of the local telecommunications company. The equipment must also be installed using an acceptable method of connections. The customer should be aware that compliance with the above conditions may not prevent degradation of service in situations

FCC AND IC REGULATIONS

connections of the power utility, telephone lines and internal metallic

water pipe system, if present, are connected together. This precaution

Caution: Users should not attempt to make such connections

themselves, but should contact appropriate electric

inspection authority, or electrician, as appropriate.

may be particularly important in rural areas.

Repairs to certified equipment should be made by an authorized The REN assigned to this device denotes the number of Canadian maintenance facility designated by the supplier. Any devices you may connect to the telephone loop which is repairs or alterations made by the user to this equipment, or equipmen used by the device to prevent overloading. The termination malfunctions, may give the telecommunications company cause t on a loop may consist of any combination of devices request the user to disconnect the equipment. Users should ensure for their own protection that the electrical ground REN does not exceed five(5.0).

> This device complies with RSS-210 of Industry Canada. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference including interference that may cause undesired operation of the

- operating on the same channel or security code. Place the Belt Pack in the cradle for a few moments to reload the security code and reset the channel.

COMMON CURE FOR ELECTRONIC

Electronics. like people, can sometimes get confused. If the unit does not seem to be responding normally, then try putting the Belt Pack in the cradle to re-initialize the unit. If it still does not seem to respond, perform the following steps (in the order listed):

- 1. Disconnect the power to the Base. 2. Disconnect the Belt Pack battery pack.
- Wait a few minutes.
- Connect power to the Base.
- Reconnect the Belt Pack battery
- 6. Place the Belt Pack in the Base unit cradle. If the Belt Pack has not been recently charged, allow 8 hours before use

HEADSET INSTALLATION & OPERATING INSTRUCTIONS

The VT1411 is designed for your hands-free operation. You should use your phone with the headset provided.

18

INSTALLATION

Make sure you have a compatible 2.5mm Headset with you. Locate the Headset Jack on the Belt Pack of your **VT1411**. Connect the plug on the Headset to the jack on the cordless Belt Pack. The plug should fit securely. Do not force the connection. See illustration.

The VTECH brand compatible Headset has a monaural design which is reversible, so you can wear your Headset on either the left or right ear, leaving one ear free for room conversation.

To obtain additional Headsets and Battery Packs, please contact VTECH Communications Customer Service; in the U.S. at 1-800-595-9511; in the Canada call 1-800-267-7377, for dealer information in your local area. You can also purchase a compatible Headset or Battery Pack directly from VTECH Communications Customer Service.

MAINTENANCE

TAKING CARE OF YOUR TELEPHONE.

Your VT 1411 cordless telephone contains sophisticated electronic parts so it must be treated with care.

Avoid rough treatment

Place the Belt Pack down gently. Save the original packing materials to protect your telephone if you ever need to ship it.

Avoid Water

Your telephone can be damaged if it gets wet. Do not use the Belt Pack outdoors in the rain, or handle it with wet hands. Do not install your base unit near a sink, bathtub or shower. Remember that electrical appliances can cause serious injury if used when you are wet or standing in water. If your base unit should fall into water, **DO NOT RETRIEVE IT** UNTIL YOU UNPLUGTHE POWER CORD AND TELEPHONE LINE CORDS FROM THE WALL. Then pull the unit out by the unplugged cords.

Electrical Storms

Electrical storms can sometimes cause power surges harmful to electronic equipment. For your own safety, use caution when using electric appliances during storms.

Cleaning your telephone

Your telephone has a durable plastic casino

that should retain its luster for many years. Clean it only with a soft cloth slightly dampened with water or a mild soap. Do not use excess water or cleaning solvents of any
