

Features & Benefits Guide

Our newest generation of cordless hotel phones reflects the top concerns our channel partners and key industry contacts have shared with us, including guest safety, cost savings and guest convenience. We have created this quick reference guide to summarize how VTech hotel phones address these issues with key features and benefits.

| Category | Feature | Equals | Benefit | Phone Image | Representative Models |
|--------------|---|------------------|--|--|--|
| Guest Safety | Our phones have battery backup so they still work normally during power outages | Which means that | Phones provide guest safety protection by allowing guests to call for help even when the power goes out |  | CTM-A2411-BATT |
| | Our cordless handsets have a backlit dialpad | | If the power goes out, the phones provide guest safety protection with illuminated dialpads that guests can use to dial out |  | CTM-A2411-BATT, CTM-A241SD |
| Save Costs | Our accessory phones use DECT technology to communicate | | Save money on PBX ports or SIP licenses by using DECT accessories that only require a power jack to operate |  | CTM-A241P, CTM-A241SD, S2310 |
| | Our phones are Energy Star-qualified | | VTech products consume less power than competitive products, resulting in real cost savings on the hotel's electricity bill |  | CTM-A2411-BATT, CTM-A2411, CTM-A2510, CTM-A241SD |
| | Our phones use laser-etch and double-injection printing instead of silkscreen | | The printing on the keys (such as 0-9, REDIAL, etc.) will not rub off from guest usage or require replacement within a few years |  | All |
| Convenience | Our accessory phones are small and compact | | Save space on the nightstand so guests can place their smart phones and tablets within easy reach |  | CTM-A241P, CTM-A241SD, S2310 |
| | Our cordless handsets come standard with a speakerphone | | On a long conference call, guests can walk around untethered and continue the call comfortably, hands-free |  | CTM-A2411, CTM-A241SD |
| | Our phones have USB charging ports | | Instead of unplugging the clock radio to charge their Android™, iPhones® or other smart phones, guests can use the USB charging ports on the side of the phones |  | CTM-S2411, CTM-A241P |
| | Our cordless handsets come with 3 speed dials | | Your guests can take the handset out on the patio to relax, while still easily retrieving messages or calling room service or the front desk without having to walk back to the desk phone |  | CTM-A2411, CTM-A241SD |
| | Our phones support easy handset pairing | | Lost handsets are easy to replace; simply place the replacement handset on the phone base to pair it and start making calls |  | CTM-A2411, CTM-A241SD |

NOTE: All VTech hotel phones are available in analog or SIP technology; 1- or 2-line.
