

ErisStation[®] Conference Phone with Wireless Mics

A revolution in audio conferencing

From the corporate boardroom to smaller, more intimate spaces, VTech ErisStation conference phones ensure your conference calls are crisp, clear and easy to manage. Choose the phone that fits your business: analog models with two or four wireless mics or a SIP model with four wireless mics and a USB connection for a PC speakerphone. Then enjoy conference calls that are as productive as face-to-face meetings.

VTech Orbitlink Wireless Technology[™]

ErisStation features portable DECT 6.0 microphones with Orbitlink Wireless Technology, making conference calls more flexible and engaging than ever before. The microphones transmit multiple digital audio streams, which are synchronized to maximize pickup range in all directions. Meeting participants can spread out and speak without having to raise their voices, regardless of conference room size.

Integrated digital mixing technology delivers unified audio, giving callers on the other end a seamless experience and the impression that everyone's speaking into the same microphone.

Premium Sound Quality

Advanced audio features improve conferencing for both sides of the conversation. Acoustic echo cancellation enables full-duplex technology, which allows natural, two-way discussions to occur simultaneously—without audio clipping or fragmentation on either end. Automatic gain control (AGC) normalizes audio levels, so even soft speakers come through loud and clear.

The cabinet housing design and audio equalization capabilities have been carefully engineered to maximize sound levels and ensure superior performance.

Interference-Free Conferencing

There's no need to worry about background noise from computer fans, ventilation systems or light fixtures interfering with calls. Dynamic noise reduction (DNR) automatically eliminates distracting ambient noise for clear conversations that flow naturally. DECT 6.0 wireless technology in the microphones prevents interference from mobile phones and other wireless devices, enabling up to 12 hours of continuous talk time on each one.

Full of Features

Everything you need to get down to business and keep the conversation flowing.

- **DECT 6.0 technology:** Place the wireless microphones anywhere in a conference room and enjoy interference-free, high-quality sound.
- **Full room coverage:** Up to 2 fixed microphones and 4 wireless microphones maximize room coverage and participation.
- **Natural sound quality:** Thanks to features like full-duplex technology, digital mixing and audio equalization, nothing is lost in translation.
- **Charging built-in:** Magnetic charging bays in the base phone ensure the wireless microphones are always charged and ready.
- **Ample talk time:** With up to 12 hours of talk time on each wireless microphone, there's plenty of room for meetings that run over.
- **Two-year standard warranty:** Enjoy the peace of mind that comes with an industry-leading, standard two-year warranty.
