Handset for easy access to your voicemail. You can save your access number on each handset when not in use.

1. Press MENU on the handset to enter the menu.
2. Scroll to Call block.
3. Press SELECT.
4. Scroll to Add a call block list entry.
5. Press SELECT.
6. Use the dialing keys to enter the phone number.
7. Press #.
8. When the desired caller ID log entry displays, press SELECT to save.

To delete all caller ID log entries:
1. Press MENU on the handset to enter the menu.
2. Scroll to Call block.
3. Press SELECT.
4. Scroll to Delete all call block list entries.
5. Press SELECT.
6. When the desired call block list entry displays, press SELECT to delete.

• When you subscribe to a voicemail service, change your answering system’s announcement. The system knows your service provider, and will provide you with a voicemail service announcement. Some voicemail service providers may program the announcement to play when an incoming call is received with no voicemail service answers after six rings.

Important: You must set your remote access code for voicemail service to work. Contact your service provider to request a remote access code.

To set your remote access code:
1. Press # when you hear your voicemail service announcement.
2. Voice guide prompts you to record a remote code. You hear the voice prompt “Record after the tone.”
3. Press # (or *) to stop at any time.
4. Press # (or *) to activate the tone.
5. Entering a two-digit security code (00-99) is required to access your messages and/or change the system’s settings.
6. Press # (or *) to stop at any time.
7. After the remote code is set, you hear the voice prompt “Remote code set.”

About the built-in answering system and voicemail service

About the built-in answering system

- Use your built-in answering system to automatically answer and record telephone calls.
- The system will play an announcement (your name, the date, and time) that identifies your caller and your voicemail service provider.
- The system can record messages up to three minutes in length. The total storage capacity is limited to five messages. The announcement can be up to 90 seconds in length. The total storage capacity is limited to five messages. The default maximum length is three minutes, but you can change this setting.
