MOUNT (OPTIONAL)

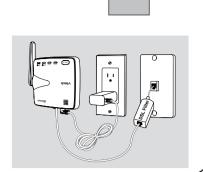

Use a pencil to mark two holes on the wall in parallel. Drill two holes in the wall.

If you drill the holes into a stud, go to the next step. · If you drill the holes into an object other than a stud, insert the wall anchors into the holes. Tap gently on the ends with a hammer until the wall

anchors are flush with the wall. Insert the screws into the holes and tighten the

IMPORTANT SAFETY INSTRUCTIONS

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury, including the following Read and understand all instructions

- . Follow all warnings and instructions marked on the
- Use only with UL listed Bluetooth devices
- Unplug this product from the wall outlet before cleaning Do not use liquid or aerosol cleaners. Use a damp cloth
- CAUTION: Do not install the telephone base at a height above 2 meters.
- o. Do not use this product near water such as near a bath tub, wash bowl, kitchen sink, laundry tub or a swimming pool, or in a wet basement or shower
- Do not place this product on an unstable table, shelf, stand or other unstable surfaces. 8. Avoid placing the telephone system in places with
- extreme temperature, direct sunlight, or other electrical devices. Protect your phone from moisture, dust, corrosive liquids and fumes. 9. Slots and openings in the back or bottom of the telephone base and handset are provided for ventilation.
- o protect them from overheating, these openings must not be blocked by placing the product on a soft surface such as a bed, sofa or rug. This product should never be placed near or over a radiator or heat register. This product should not be placed in any area where proper ventilation is not provided 10. This product should be operated only from the type of
- power source indicated on the marking label. If you are not sure of the type of power supply in your home or office, consult your dealer or local power compan 1. Do not allow anything to rest on the power cord. Do not
- install this product where the cord may be walked on. Never push objects of any kind into this product through the slots in the telephone base or handset because they
- may touch dangerous voltage points or create a short circuit. Never spill liquid of any kind on the product. 13. To reduce the risk of electric shock, do not disassemble this product, but take it to an authorized service facility. Opening or removing parts of the telephone base or handset other than specified access doors may expose you to dangerous voltages or other risks. Incorrect
- eassembling can cause electric shock when the produc is subsequently used. 14. Do not overload wall outlets and extension cords.
- 15. Unplug this product from the wall outlet and refer servicing to an authorized service facility under the
- · When the power supply cord or plug is damaged or
- If liquid has been spilled onto the product.
- If the product has been exposed to rain or water. If the product does not operate normally by following the operating instructions. Adjust only those controls
- in damage and often requires extensive work by an authorized technician to restore the product to normal • If the product has been dropped and the telephone

that are covered by the operation instructions.

Improper adjustment of other controls may result

base and/or handset has been damaged

- If the product exhibits a distinct change in performance. 16. Avoid using a telephone (other than cordless) during an electrical storm. There is a remote risk of electric shock rom lightning.
- 17. Do not use the telephone to report a gas leak in the vicinity of the leak. Under certain circumstances, a spark may be created when the adapter is plugged into the power outlet, or when the handset is replaced in its cradle. This is a common event associated with the closing of any electrical circuit. The user should not plug the phone into a power outlet, and should not put a charged handset into the cradle, if the phone is located in an environment containing concentrations of flammable or flame-supporting gases, unless there is adequate
- a leak of natural gas; etc. 18. Only put the handset of your telephone next to your ear
- when it is in normal talk mode. The power adapter is intended to be correctly oriented in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a

Do not open or mutilate the battery. Released to the eyes or skin. The electrolyte may be toxic if Exercise care in handling batteries in order not to create

- a short circuit with conductive materials. Charge the battery provided with this product only
- in accordance with the instructions and limitations specified in this manual.

Precautions for users of implanted cardiac pacemakers Cardiac pacemakers (applies only to digital cordless

Wireless Technology Research, LLC (WTR), an independen research entity, led a multidisciplinary evaluation of the interference between portable wireless telephones and implanted cardiac pacemakers. Supported by the U.S. Food and Drug Administration, WTR recommends to physicians

Pacemaker patient

- Should keep wireless telephones at least six inches from
- Should NOT place wireless telephones directly over the pacemaker, such as in a breast pocket, when it is turned ON. Should use the wireless telephone at the ear opposite
- WTR's evaluation did not identify any risk to bystanders with pacemakers from other persons using wireless telephones.
- Privacy: The same features that make a cordless telephone convenient create some limitations. Telephone calls are transmitted between the telephon pase and the cordless handset by radio waves, so there is a possibility that the cordless telephone conversations could be intercepted by radio receiving equipment within range of the cordless handset. For this reason, you should not think of cordless telephone

ABOUT CORDLESS TELEPHONES

- conversations as being as private as those on corded Electrical power: The telephone base of this cordless elephone must be connected to a working electrical outlet. The electrical outlet should not be controlled by a wall switch. Calls cannot be made from the cordless handset if the telephone base is unplugged, switched
- off or if the electrical power is interrupted. Potential TV interference: Some cordless telephones operate at frequencies that may cause interference televisions and VCRs. To minimize or prevent such interference, do not place the telephone base of the cordless telephone near or on top of a TV or VCR.
