

Quick start guide LS6475-2/LS6475-3/LS6476-4

Introduction

This quick start guide provides you with the basic installation and use instructions. A limited set of features are described in abbreviated form.

Please refer to the user's manual for complete installation and operation instructions.

Telephone base and charger installation

Install the telephone base and charger as shown below.

Handset battery installation and charging

Install the battery as shown below. Once you have installed the battery, you may be able to make and receive short calls. For best performance, charge the handset battery continuously for at least 10 hours.

1. Plug the battery connector securely into the socket inside the handset battery compartment, matching the color-coded label.
2. Place the battery with the label **THIS SIDE UP** facing up and the wires inside the battery compartment.

3. Slide the battery compartment cover towards the center of the handset until it clicks into place.
4. Place the handset in the telephone base or charger to charge.

Headset charging

After installing the telephone base, charge the headset as shown below. The headset is fully charged after three hours of continuous charging. If the light does not turn on while charging, you need to charge the headset without interruption for at least 15 minutes to give the headset enough charge to use for a short time.

1. Place the tip of the headset in the small cradle on the telephone base.

2. The magnet holds the top of the headset in place. The light turns on when charging.

- Press **MENU/SELECT**.
- Use the dialing keys to modify the name if necessary.
- Press **MENU/SELECT** to save.

To delete the caller ID log entries:

- Delete one entry:** When the desired caller ID log entry displays, press **MUTE/DELETE**.
- Delete all entries:** Press **MENU/SELECT** when the handset is not in use. Scroll to **>Caller ID log** and then press **MENU/SELECT**. Scroll to **>Del all calls** and then press **MENU/SELECT** twice.

About answering system and voicemail

Your telephone has separate indicators for two different types of voice messages: those left on the built-in answering system and those left at your telephone service provider's voicemail. Each alerts you to new messages separately.

- If **XX New messages** and **📞** display on the handset and the message window on the telephone base flashes, there are messages recorded on the built-in answering system.
The total recording time is approximately 14 minutes. The answering system can record and store up to 99 messages and the recording time of each message depends on the message length you set.
- If **New Voicemail** and **📞** display on the handset, your telephone service provider is indicating that it has new voicemail for you. Contact your telephone service provider for more information on how to access your voicemail.

Answering system settings

Default settings are indicated by asterisks (*).

Screen display	Function	Options
Call screening	Set whether you hear the callers while they are leaving messages to you.	On* Off
# of rings	Set the number of times the telephone rings before the answering system answers.	6; 5; 4*; 3; 2; Toll saver
Remote code	Set a two-digit security code to access the answering system remotely from any touch-tone telephone.	19*
Msg alert tone	Set to alert you when you have new messages.	On Off*
Recording time	Set the recording time for each incoming message.	3 minutes* 2 minutes 1 minute
