# CONNECT, CHARGE AND POWER ON THE BABY

### ■ Notes

- Please peel off the lens/screen protector before use. Charge the parent unit battery before use.
- When powering up, the baby unit's orange status LED turns on. It will turn off after a while and remain off if the status LED is set to off.
- The status LED is set to off by default. You can turn it on using the app
- (Setting > Camera Setting > LED status). • A steady orange light with no video or audio streaming can indicate a fault

## DOWNLOAD APP FOR MOBILE ACCESS

Use the MyVTech Baby Plus on your mobile device to monitor your baby remotely. Follow the instructions below to set up and pair your baby monitor with the app.

have previously installed the app, ensure that you have the latest version. ■ Note

#### Make sure your mobile device meets the

minimum requirement for the mobile app

### Minimum requirement

The mobile app is compatible with:

- Android<sup>™</sup> 9.0 or later (Not compatible with mobile devices with a 32-bit Android operating system); and
- iOS 14 or later.

2. Tap 2 to launch the mobile app on your device and create an account 3. We recommend that you use common webmail services, such as Google Gmail, to

- register your user account. Check your email (including the Spam folder) and activate your new account by entering the email verification code. Then, sign in to your account. 4. Ensure that you are connected to a 2.4GHz Wi-Fi network and have enabled Bluetooth
- and Location Service on your device.
- After signing in to the app, select Camera(s) with Parent unit and scan the QR code displayed on the parent unit. To find the QR code, press the MENU/SELECT button and go to Connect to Mobile App.
- 6. Input the Wi-Fi password from the app.
- . Press and hold the pair key on the baby unit for 3 seconds until you hear the beep sound to enter pairing mode.
- 8. Select the camera model that appears in the app and wait for the camera to connect. Once connected, it will display a live view preview.
- P. Select "Continue" and create a profile for your baby (optional). Now you can start monitoring! (For models with 2 cameras, a pop-up will ask if you wish to connect another camera. Repeat steps 7-9 for the second camera.)

Use Camera Sharing to instantly share access to the camera. Follow these steps:

- 1. Go to Menu and select Camera Sharing.
- 2. Choose "Invite People" and enter the name and email address of the family member's app
- 3. The family member will receive a pop-up notification in the app and can accept the invitation to access the camera(s)

# How the system works

#### walls between them. Move the parent unit closer to the baby unit to improve the signal strength. Ensure the parent unit antenna is raised for optimum reception.

You may experience reduced signal

#### Wi-Fi mode

Direct mode

To enhance your experience and enjoy seamless live video streaming via your mobile app, and to receive product software updates (when available), we highly recommend setting up your monitor's Wi-Fi connection.

your mobile device, download

and install the MyVTech Baby Plus mobile app. With the mobile app, your Wi-Fi router (not included) provides Internet connectivity to your HD video monitor system. It serves as a communication channel between your baby unit and mobile device, allowing you to monitor and/or control your baby unit wherever you are. For more details, see **Download app for** mobile access section in this quick start quide.

# CABLE MANAGEMENT

#### TECHNICAL SPECIFICATIONS

Baby unit: 2402 - 2480 MHz (WiFi, FHSS, BLE) Max Transmit power is 10mW (WiFi, FHSS, BLE)
Parent unit: 2406 - 2475 Mhz Max Transmit power is 100mW
5" Color LCD (IPS 1280x720 pixels)
Maximum power allowed by FCC and IC. Actual operating range may vary according to environmental conditions at the time of use.
Baby unit power adapter: Output: 5V DC, 1A. Parent unit power adapter: Output: 5V DC, 2A. Parent unit battery: 3.7V 5000mAh, 18.5Wh Lithium-ion battery

### TEST THE SOUND LEVEL AND POSITION THE BABY MONITOR

#### Testing the sound level of the baby monitor

• This baby monitor is intended as an aid. It is not a substitute for proper adult supervision, and should not be used as such.

#### (1) CAUTION

• For hearing protection, make sure the parent unit is more than 10 feet away from the baby unit. If you hear any feedback noise from the parent unit, move the parent unit further until the noise stops. You can also press **VOL** – on the parent unit to lower or mute the noise.

#### · Increase the parent unit speaker volume if you cannot hear the sounds transmitted from the baby unit.

#### Positioning the baby monitor

#### ① CAUTION

- · Keep the baby unit out of reach of your baby. Never place or mount the baby unit inside the baby's crib or
- 1. Place the baby unit more than 3 feet away 2. Adjust the angle of the baby unit to from your baby.

aim the camera at your baby

#### 3. To avoid causing feedback noise from your baby monitor:

- Make sure your baby unit and parent unit are more than 10 feet apart; OR
- Turn down the volume of your parent unit.

#### TEST THE LOCATION FOR THE BABY UNIT

If you plan to install your baby unit in a designated location, and use your home Wi-Fi network to connect your video monitor, you need to test which of your selected monitoring areas within the house have good Wi-Fi signal strength. After you have powered on your parent unit, you can use your parent unit's Wi-Fi signal icon(s) to assist in checking. Once you have identified the suitable location, you can install your baby unit. Adjust the distance between your baby unit and the Wi-Fi router if needed.

Surroundings and obstructing factors, such as large metallic objects, filing cabinets, long distances, electrical appliances, and internal walls, may reduce Wi-Fi signal.

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit detects low light levels, the infrared LEDs are switched on automatically. The images from the baby unit are in black and white, and \*( appears on the parent unit screen.

#### NOTES

- A click sound from the baby unit is a normal and occurs when your unit adapts to the environment lighting
- To achieve accurate and high quality video, your baby unit is equipped with an Infrared cut-off filter lens that optimizes color accuracy in bright, day-time environments. When the nvironment turns dark at night, this filter lens is withdrawn to enhance night vision quality. The brief click sound you hear is from the filter lens activating/deactivating as the unit switches from day to night vision (and
- Depending on the surroundings and other interfering factors, for example, lighting, objects, colors and backgrounds. the image quality may vary. Adjust the baby unit angle or place the baby unit at a higher location to prevent glare and a blurred display.

### ■ NEED HELP?

→ NIGHT VISION

For instructions and guides to make the best use of your baby monitor, and for the latest information and support, check out our online help topics and FAQs. The online help page will also be updated periodically to reflect product system updates.

- Use your smartphone or mobile device to access our online help.
- Go to https://help.vtechphones.com/rm5856hd or https://help.vtechphones.com/rm5856-2hd; OR
- Scan the QR code on the right. Launch the camera app or QR code scanner app on your smartphone or tablet. Hold the device's camera up to the QR code and frame it. Tap the notification to be redirected to the online help page
- If the QR code is not clearly displayed, adjust your camera's focus by moving your device closer or further away until the image is

### MOUNT THE BABY UNIT (OPTIONAL)

#### NOTES

- Check the reception strength and baby unit camera angle before drilling any holes:
- The types of screws and anchors you need depend on the composition of the wall. You may need to purchase the screws and anchors separately to mount
- 1. Place the wall mount bracket on a wall and then use a pencil to mark two holes in parallel. Remove the wall mount bracket and drill two holes in the wall (7/32 inch drill bit).

- 2. If you drill the holes into a stud, go to step 3.
- If you drill the holes into an object other than a stud, insert the anchors into the holes. Tap gently on the ends with a hammer until the anchors are flush with the wall.

4. Place the baby unit on the wall mount bracket, and then slide it forward until it locks into place. Align the holes on the wall mount bracket with the screws on the wall, and slide the wall mount bracket down until it locks into place.

Insert the screws into the holes and

the screws are exposed

tighten the screws until only 1/4 inch of

5. You can maximize your baby unit viewing angle by tilting the wall mount bracket. Hold the baby unit, and then rotate the knob in an anticlockwise direction. This will loosen the joint of the wall mount bracket. Tilt your baby unit up or down to adjust to your preferred angle. Then, rotate the knob in a clockwise direction to tighten the

#### ❤ GENERAL PRODUCT CARE

To keep this product working well and looking good, follow these guidelines:

- Avoid placing near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps)
- · DO NOT expose to direct sunlight or moisture.
- Avoid dropping the product or treating it roughly.
- · Clean with a soft damp cloth.
- DO NOT immerse the parent unit or the baby unit in water and do not clean under running water.
- DO NOT use solvents, household cleaning sprays, or liquid cleaners.
- Make sure the parent unit and the baby unit are dry before reconnecting to the mains supply.

#### STORAGE

When you are not going to use the video monitor for some time, store the parent unit, the baby unit and the adapters in a cool, dry place.

#### A Frequently asked questions

Below are the questions most frequently asked about the video monitor Can I turn the parent

Yes, press **O** | **LCD ON/OFF** on the parent unit to turn off the screen. unit display screen Press any key to turn the screen back on. off but keep hearing sounds from the baby unit? Why is the baby Try the following (in the order listed) for a common cure: unit not responding 1. Disconnect the power to the baby unit.

### **FCC AND IC REGULATIONS**

NOTE: This equipment has been tested and found to comply with the requirements for a Class B digital device under Part 15 of the Federal Communications Commission (FCC) rules. These requirements are intended to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the

- interference by one or more of the following measures: Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

  Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

WARNING: Changes or modifications to this equipment not expressly approved by the party responsible for compliance could void This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired

user or bystander according to the intended usage of the product. This product has been tested and found to comply with the FC criteria. The baby unit shall be installed and used such that parts of all persons' body are maintained at a distance of approximately 8 in (20 cm) or more. The transmitter and antenna of the parent unit shall be held at least 1 in (2.5 cm) from your face. This Class B digital apparatus complies with Canadian requirement:

#### **Industry Canada**

This device contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions: (1) This device may not cause interference. (2) This device must accept any interference, including interference that may cause undesired operation of the device. The term "IC:" before the certification/registration number only signifies that the Industry Canada technical specifications were met

This product meets the applicable Innovation. Science and Economic Development Canada technical specifications

#### RF radiation exposure statement

The product complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. The baby unit should be installed and operated with a minimum distance of 8 in (20 cm) between the baby unit and all persons' body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. This equipment complies also with Industry Canada RSS-102 with respect to Canada's Health Code 6 for Exposure of Humans to RF Fields

#### CALIFORNIA ENERGY COMMISSION BATTERY CHARGING TESTING MODE

This video monitor meets the California Energy Commission (CEC) regulations for energy consumption. Your video monitor is set up to comply with the energy-conserving standards right out of the box. Follow the instructions to install and charge the battery. The CEC battery charging testing mode is activated while charging.

Even if the parent unit is paired to camera units, the CEC battery charging testing mode is activated while it is powered off and
