Quick start guide

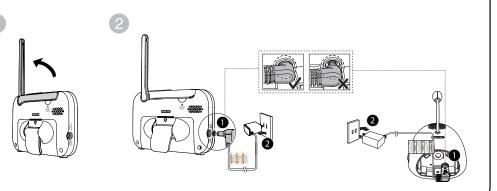

INSTALL THE BATTERY

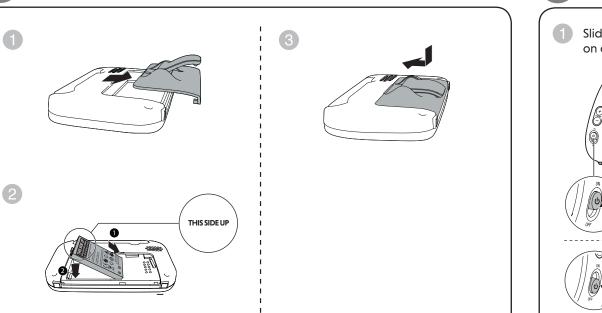

2 CONNECT THE BABY MONITOR

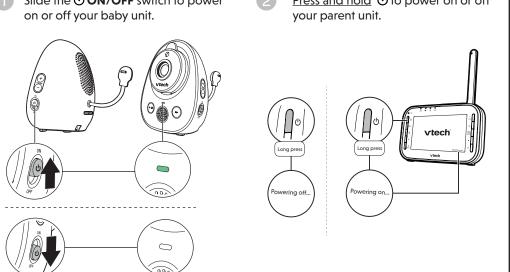

- Use only the power adapters supplied with this product.
- Make sure the baby monitor is not connected to an electric outlet that is controlled by a switch.
- Connect the power adapters in a vertical or floor mount position only. The adapters' prongs are not designed to hold the weight of baby monitor, so do not connect them to any ceiling, under-the-table, or cabinet outlets. Otherwise, the adapters may not properly connect to the outlets.
- Make sure the parent unit, the baby units and the power adapter cords are out of reach of children.

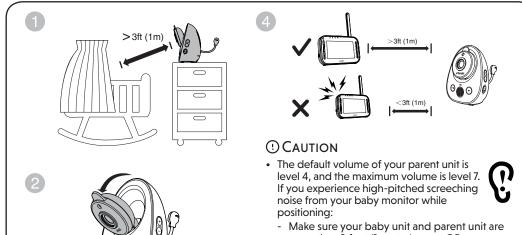

POWER ON OR OFF THE BABY MONITOR

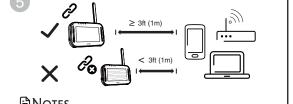

POSITIONING THE BABY MONITOR

- Make sure your baby unit and parent unit are more than 3 feet (1 meter) apart, OR
- Lower the volume of your parent unit.

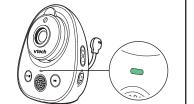

• To avoid interference from other electronic devices, place your baby monitor at least 3 feet (1 meter) away from devices such as wireless routers, microwaves, cell phones and computers.

5 STATUS CHECK

Once you power on both your baby unit and parent unit, your parent unit displays image from the baby unit, and the LINK LED light turns on.

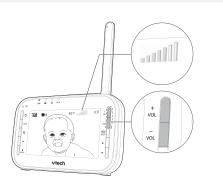

BASIC OPERATION - PARENT UNIT

Adjust speaker volume

OVERVIEW - PARENT UNIT

OVERVIEW - BABY UNIT

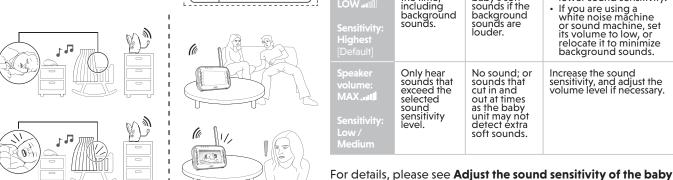

Sound sensitivity and sound activation

Highest

Adjust sound detection sensitivity

With sound sensitivity setting, you can choose to hear sounds from the baby unit all the time. or to hear sounds that exceed a certain level.

What you could do... Medium Hear all sounds all the time, including backgrounds.

Only hear sounds that exceed the selected sound sensitivity level.

sounds that cut in and

unit may not detect extra

Increase parent unit's speaker volume, and lower sound sensitivity If you are using a background sounds are white noise machine or sound machine, set its volume to low, or

background sounds. Increase the sound sensitivity, and adjust the volume level if necessary.

Sound activated screen

When sound activation is on, the parent unit screen stays off to save power when the baby unit detects no sound.

sensitivity level, the parent unit screen turns on automatically. It will then turn off again after 50 seconds of no sound detection.

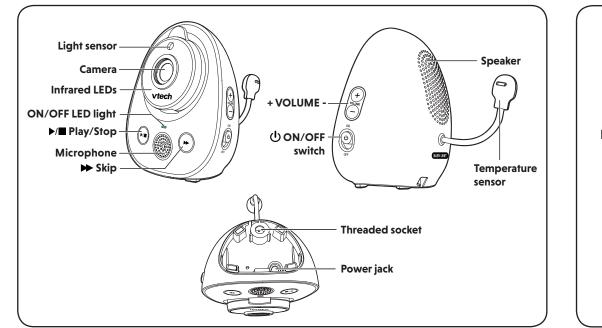

Once the baby unit detects sounds that are louder than the chosen sound

Dim Mode

NIGHT VISION

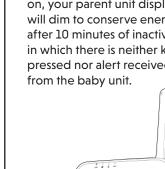

The baby unit has infrared LEDs that allow you to see your baby clearly at night or in a dark room. When the baby unit being viewed detects low light levels, the infrared LEDs are switched on automatically. The images from the baby unit are in black and white, and appears on the screen.

unit in the User's manual.

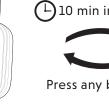

- It is normal if you see a short white glare on your parent unit screen as the baby unit is adapting to the dark environment.
- When the infrared LEDs are on, the images are in black and white. This is normal.

Depending on the surroundings and other interfering factors, like lightings, objects, colors and backgrounds, the video quality may vary. Adjust the baby unit's angle or place the baby unit at a higher level to prevent glare and blurry display.

DIM MODE

With dim mode preset to on, your parent unit display will dim to conserve energy after 10 minutes of inactivity, in which there is neither key pressed nor alert received

If you do not want LCD to dim automatically, turn off the Dim Mode.

Install the lens (optional)

The wide-angle lens (VM101) provided allows you to view more of your baby's room from the parent unit screen. Install the wide-angle lens onto the baby unit camera as shown below.

Remove the lens

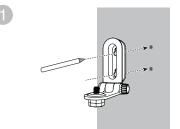

- When the lens is not in use, cover both sides of the lens with the lens covers provided to avoid
- · You can purchase and install an extra new wide-angle lens (VM101) onto your baby unit if necessary.

MOUNT THE BABY UNIT (OPTIONAL)

₿Note The types of screws and anchors you need

depend on the composition of the wall.

NOTE

 Check for reception strength and camera angle before drilling the holes.

Place the wall mount bracket on a wall and then use a pencil to mark the top and the bottom holes as shown. Remove the wall mount bracket and drill two holes in the wall (7/32 inch drill bit).

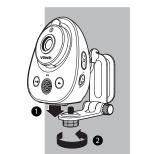

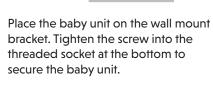

If you drill the holes into a stud, go to

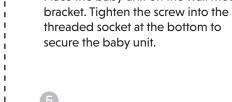

If you drill the holes into an object other than a stud, insert the wall anchors into the holes. Tap gently on the ends with a hammer until the wall anchors are flush with the wall.

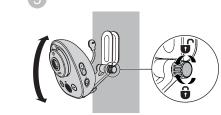

Insert the screws into the holes and tighten the screws until only 1/4 inch of the screws screws with the holes in the wall as are exposed. shown. Tighten the screw in the middle hole first, so that the wall mount bracket position is fixed. You can tighten the other screw in the top hole

You can maximize your baby unit's viewing angles by tilting the wall mount bracket.

Place the baby unit on the wall mount

socket at the bottom to secure the baby

bracket with the screws on the wall, and

slide the wall mount bracket down until it

unit. Align the holes on the wall mount

locks into place.

bracket. Tighten the screw into the threaded

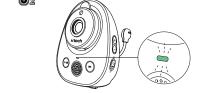

Hold the baby unit, and then rotate the knob in anticlockwise direction. This will loosen the joint of the wall mount bracket. Tilt your baby unit up or down to adjust to your preferred angle. Then, rotate the knob in clockwise direction to tighten the joint and secure the angle.

Status check - Two baby units

If you are viewing baby unit 📵 1, the ON/OFF LED light of baby unit 🕲 1 turns on. As baby unit **1** is not being viewed, its **ON/OFF** LED light flashes.

 If you power on only one baby unit, you may see the parent unit displaying \(\begin{aligned} \begin{aligned} \text{and then} \end{aligned} \) No link to CAM # (# represents the baby unit number), and the LINK LED light flashing. Press VIEW in Single CAM or Patrol mode to switch to the baby unit you have powered on.

Change different views - Single CAM

In **Single CAM** or **Patrol** mode, press **VIEW** to switch between the image of baby units 01 and 02.

Change different views - Patrol

Select Patrol as your monitoring mode to alternately view the image from baby units ●1 and ●2 every 10 seconds.

Select **Split** as your monitoring mode to view the images from both baby units at once.
