CONNECT AND CHARGE THE BATTERY

Install the parent unit battery

The parent unit runs on rechargeable battery or AC power. To continuously monitor your baby, keep the parent unit connected to AC power. With the battery alone, the parent unit can cordlessly run for a short time only.

□ NOTES

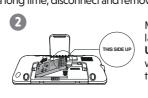

Use only the battery supplied with this product.

If the parent unit will not be used for a long time, disconnect and remove the battery to prevent possible leakage

Replace the battery

Press down on the battery compartmen cover to pull

Make sure the label THIS SIDE THIS SIDE UP UP is facing up while inserting the battery.

To replace the battery, press down on the battery compartment cover and pull it out, then follow the steps above to install the battery.

Connect the baby monitor

NOTES

- Use only the power adapters supplied with this product
- Make sure the baby monitor is not connected to an electric outlet that is controlled by a switch. Connect the power adapters in a vertical or floor mount position only. The adapters' prongs are not
- designed to hold the weight of baby monitor, so do not connect them to any ceiling, under-the-table, or cabinet outlets. Otherwise, the adapters may not properly connect to the outlets.
- Make sure the parent unit, the baby unit and the power adapter cords are out of reach of children.

Charge the parent unit battery

When you have connected the parent unit and installed its battery for the first time or after power outage, the parent unit powers on automatically. The battery icon indicates the battery status (see the following table).

- The parent unit battery is fully charged after 3 hours of continuous charging
- It takes longer to charge the battery when the parent unit is turned on. To shorten the charging time, turn the parent unit off while charging
- The standby time varies depending on the sensitivity level you set, your actual use and the age of the battery
- The battery icon is off and No battery is installed but Install the parent unit battery.
