Your IP camera package contains the following items. Save your sales receipt and original packaging in the event warranty service is necessarv

vtech Installation guide

How the system works

The Wi-Fi router (not included) provides Internet connectivity to your camera. It serves as a communicating channel between your camera and MyVTech Cams mobile app, allowing you to monitor and/or control your camera through the app wherever you are.

Protect your privacy and online security

VTech cares about your privacy and peace of mind. That's why we've put together a list of industry-recommended best practices to help keep your wireless connection private and your devices protected when online. We recommend you carefully review and consider complying with the following tips.

Ensure your wireless connection is secure. • Before installing a device, ensure your router's wireless signal is encrypted by selecting the "WPA2-PSK with AES" setting in your router's wireless security menu.

Change default settings.

- Change your wireless router's default wireless network name (SSID) to something unique. · Change default passwords to unique, strong
- passwords. A strong password: - Is at least 10 characters long.
- Is complex.
- Does not contain dictionary words or
- personal information.
- Contains a mix of uppercase letters, lowercase letters, special characters and numbers

Keep your devices up to date.

- · Download security patches from manufacturers as soon as they become available. This will ensure you always have the latest security updates.
- If the feature is available, enable automatic updates for future releases.

Disable Universal Plug and Play (UPnP) on your router.

· UPnP enabled on a router can limit the effectiveness of your firewall by allowing other network devices to open inbound ports without any intervention or approval from you. A virus or other malware program could use this function to compromise security for the entire network.

Requirements

Make sure your system includes the following components, and they meet the minimum requirement.

Smartphones/tablets	 Android [®] or iOS devices with 3G/4G mobile communication. Android 4.4 or later; or iOS 8.0 or later.
Network	Wi-Fi
Wi-Fi router	2.4GHz IEEE 802.11 b/g/n
Internet connection	At least 1.0 Mbps upload bandwidth per camera
Video codec	H.264
micro SD card (optional)	Support Class 4 or higher, with storage capacity up to 32GB
MyVTech Cams	Connect up to 10 comoras

micro SD card (optional)	Support Class 4 or higher, with storage capacity up to 32GB
MyVTech Cams mobile app	Connect up to 10 cameras

- 7 Power jack
- 8 Ethernet port

Connect

You can choose to set up the camera unit for desktop usage, wall mounting or ceiling mounting.

ONOTES

- Use only the camera power adapter supplied with this product.
- Make sure the electrical outlet is not controlled by
- wall switch. The power adapter is intended to be correctly oriented
- in a vertical or floor mount position. The prongs are not designed to hold the plug in place if it is plugged into a ceiling, under-the-table or cabinet outlet Make sure the camera unit and the power adapter
- cord are out of reach of children

Connect the IP Camera Wi-Fi connection

BNOTES

- Before you connect the IP camera, make sure you have Internet access and a Wi-Fi router (IEEE 802.11 b/g/n). Data charges apply and service plan may vary for Internet access. Router is not included. · Do not plug in the network cable.
- To maintain compliance with the FCC's RF exposure guidelines, place the IP camera at least 20cm from nearby persons.
- Connect the power adapter to the camera unit and a power supply.

Overview

(1)

1 – Light sensor 2 – Infrared LEDs

- surrounding 3 – Camera lens
- 4 Microphone 5 – Antenna

· Allow you to see clearly in a dark

· Connect to router with Wi-Fi.

· Connect to router with a RJ45 network cable (optional).

To turn off the IP camera, unplug the camera unit from the power supply.

Cable connection (optional)

After you have paired the camera unit with your mobile device via Wi-Fi, you can connect the camera unit to the Internet using the network cable to optimize your Internet connection. Read the following sections to set up your IP camera.

9 – 3.5mm line jack

- · Connect to audio output device (optional).
- 10 micro SD card slot 11 – LED indicators
 - · Flash orange and blue alternately when the camera unit is in pairing mode
 - · Orange is steady on when the camera unit is connecting to the Internet.
 - · Orange and blue are steady on when the camera unit is idle.
 - · Flash orange and blue slowly during video streaming.
 - Flash orange and blue quickly and alternately when the camera unit is updating its firmware.

- · You can turn off the camera's LEDs if you find them too bright. Read the Online LED indication section under Camera settings in your online app manual for instructions.
- 12 Volume -
 - · Press to decrease the speaker volume. Volume +
 - · Press to increase the speaker volume.

13 - Pair/reset button

 Press and hold for three seconds to enter pairing mode.

Set up IP camera

After you have connected the IP camera, refer to the Quick start guide included in your package to set up your camera.

- IP camera setup:
- Install mobile app
- Create camera account
- Add camera

Test the location for IP Camera

Before you install your camera unit, you need to test which of your selected monitoring areas have good Wi-Fi signal strength. You can use your mobile device's Wi-Fi signal strength indicator to assist in checking. Once you have identified the suitable location, you can install your camera unit. Adjust the distance between your camera unit and the Wi-Fi router if needed.

- Depending on surroundings and obstructing factors, such as the effect distance and internal walls have on signal strength, you may experience reduced Wi-Fi signal. To improve the Wi-Fi signal strength. adjust the distance or direction of your mobile

Mount the IP Camera (optional)

1. Place the wall mount bracket on a wall or on the ceiling, and then use a pencil to mark two holes in parallel

- 2. Remove the wall mount bracket and then drill two holes in the wall or on the ceiling (7/32" drill bit).
- If you drill the holes into an object other than a stud, insert the wall anchors into the holes and tap gently on the ends with a hammer until the wall anchors are flush with the wall.
- 3. Align the holes on the wall mount bracket with the screws on the wall or on the ceiling Tighten the screws in the holes.

Place the camera unit on the wall mount bracket, and then slide it forward until it locks into place.

Insert micro SD card (optional) Your IP camera can capture videos of the

monitoring area when motion is detected. You can choose to save the videos to a micro SD card.

- Your IP camera supports Class 4 or higher micro SD card, with storage capacity up to 32GB
- ()CAUTION Prior to inserting or ejecting the micro SD card installed in your IP camera, the camera must be powered off. To power off, unplug the camera from the power supply.

Limited warranty

What does this limited warranty cover? The manufacturer of this VTech Product warrants to the holder of a valid proof of purchase ("Consumer" or "you") that the Product and all accessories provided in the sales package ("Product") are free from defects in material and workmanship. pursuant to the following terms and conditions, when installed and used normally and in accordance with the Product operating instructions. This limited warranty extends only to the Consumer for Products purchased and used in the United States of America and Canada

What will VTech do if the Product is not free from defects in materials and workmanship during the limited warranty period ("Materially Defective Product")?

During the limited warranty period, VTech's authorized service representative will repair or replace at VTech's option, without charge, a Materially Defective Product. If we repair the Product, we may use new or refurbished replacement parts. If we choose to replace the Product, we may replace it with a new or refurbished Product of the same or similar design. We will retain defective parts, modules, or equipment. Repair or replacement of the Product, at VTech's option, is your exclusive remedy. VTech will return the repaired or replacement Products to you in working condition. You should expect the repair or replacement to take approximately 30 days.

How long is the limited warranty period?

The limited warranty period for the Product extends for ONE (1) YEAR from the date of purchase. If VTech repairs or replaces a Materially Defective Product under the terms of this limited warranty, this limited warranty also applies to the repaired or replacement Product for a period of either (a) 90 days from the date the repaired or replacement Product is shipped to you or (b) the time remaining on the original one-year warranty; whichever is longer.

What is not covered by this limited warranty?

- This limited warranty does not cover:
- 1. Product that has been subjected to misuse, accident, shipping or other physical damage, improper installation, abnormal operation or handling, neglect, inundation, fire, water or other liquid intrusion: or
- 2. Product that has been damaged due to repair. alteration or modification by anyone other than an authorized service representative of VTech: or
- 3. Product to the extent that the problem experienced is caused by signal conditions,
- network reliability, or cable or antenna systems; or

4. Product to the extent that the problem is caused by use with non-VTech accessories; or 5. Product whose warranty/quality stickers, product serial number plates or electronic serial numbers

Astermence

- have been removed, altered or rendered illegible; 6. Product purchased, used, serviced, or shipped for repair from outside the United States of America or Canada, or used for commercial or institutional purposes (including but not limited to Products used for rental purposes); or
- 7. Product returned without a valid proof of purchase (see item 2 on the next page); or 8. Charges for installation or set up, adjustment of customer controls, and installation or repair of

How do you get warranty service?

systems outside the unit.

To obtain warranty service in the USA, please visit our website at www.vtechphones.com or call 1-844-848-8324 (1-844-84-VTECH). In Canada, go to www.vtechcanada.com or call 1-888-211-2005. NOTE: Before calling for service, please review the user's manual - a check of the Product's controls and features may save you a service call.

Except as provided by applicable law, you assume the risk of loss or damage during transit and transportation and are responsible for delivery or handling charges incurred in the transport of the Product(s) to the service location. VTech will return repaired or replaced Product under this limited warranty. Transportation, delivery or handling charges are prepaid. VTech assumes no risk for damage or loss of the Product in transit. If the Product failure is not covered by this limited warranty, or proof of purchase does not meet the terms of this limited warranty, VTech will notify you and will request that you authorize the cost of repair prior to any further repair activity. You must pay for the cost of repair and return shipping costs for the repair of Products that are not covered by this limited warranty.

What must you return with the Product to get warrantv service?

- 1. Return the entire original package and contents including the Product to the VTech service location along with a description of the malfunction or difficulty; and
- 2. Include a "valid proof of purchase" (sales receipt) identifying the Product purchased (Product model) and the date of purchase or receipt; and
- 3. Provide your name, complete and correct mailing address, and telephone number.

Connect to audio output device (optional)

Your IP camera has a built-in speaker. You can also connect an external self-powered speaker to your camera unit for extra sound quality.

Frequency	Camera unit: 2412 - 2462 MHz

General product care

To keep this product working well and looking

good, follow these guidelines: Avoid putting it near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps). DO NOT expose it to direct sunlight or

Avoid dropping the product or treating it

Clean with a soft cloth.

moisture

roughly.

Storage

DO NOT immerse the camera unit in water and do not clean it under the tap. DO NOT use cleaning spray or liquid cleaners. Make sure the camera unit is dry before you connect it to the mains again

When you are not going to use the IP camera for some time, store the camera unit and the adapter in a cool and dry place.

Frequently asked questions

Below are the questions most frequently asked about the IP camera. If you cannot find the answer to your question in the below table, visit our website at www.vtechphones.com or call 1-844-848-8324 (1-844-84-VTECH) for customer service. In Canada, go to www.vtechcanada.com or call 1-888-211-2005.

You can turn off the LEDs of your IP camera. Read the Online LED indication section under Camera settings in the online app manual for instructions.
Try the following (in the order listed) for common cure: 1. Disconnect the power to the camera unit.
2. Wait a few minutes before connecting power back to the camera unit.
3. Run the mobile app again.
The IP camera has a light sensor that measures the ambient light. When the ambient light is dim, such as during nighttime or in a dark room, the camera activates its infrared LEDs, and displays the camera view in black and white.
The camera unit may lose the Internet connection. Check your network and the router setting.
Other electronic products may cause interference with your IP camera. Try installing your IP camera as far away from these electronic devices as possible.
