

## **VTech Earns Interoperability Certification with Callcentric VoIP Services**

*ErisTerminal™ SIP Phones with Callcentric VoIP Services Deliver Quality and Affordability for Worldwide Residential and Business Customers*

**New York, NY (June 26, 2015)** – Internet telephony service provider (ITSP) Callcentric announced today it has completed certification testing for IP desk phones and DECT cordless IP phones from VTech, the world's leading manufacturer of cordless phones. Business customers worldwide who use Callcentric's VoIP phone services can easily install and use any of VTech's ErisTerminal SIP phones and enjoy a superior user experience.

Callcentric offers flexible, cost-effective SIP trunking and cloud-based service solutions for bring-your-own-device (BYOD) VoIP users. Over the past few years, the company has become one of the fastest growing and best-reviewed providers for reliability, customer support, and overall value. To deliver one of the best values in the industry, Callcentric empowers their customers to customize their services by independently selecting their inbound and outbound plans, ensuring that they purchase only the services they need.

Callcentric offers a wide range of aggressively priced plans under both flat-rate and pay-per-use service models. They offer outbound calling plans that start at \$6.95 per month and come with bundled minutes/E911; unlimited domestic/international plans are available for higher-volume users. For inbound services, Callcentric provides phone numbers in the United States, Canada, and over 50 international countries; they also support LNP (phone number porting) for standard and toll-free numbers. One of their most popular offerings is the "Free NY Phone Number" program, which allows customers to connect their VTech ErisTerminal SIP phones and perform a complete test of their inbound and in-network outbound services at no cost whatsoever.

"We are very excited to announce our partnership with VTech," said Stephen Irwin, VP of operations at Callcentric. "Our companies share the same ideology of providing innovative, high-quality solutions at an affordable price. Based on our testing, we really think that our customers will love using devices from the ErisTerminal family with our service. VTech customers can sign up for a free Callcentric account through our website and in just a few minutes they can be placing inbound/outbound calls."

"VTech is pleased to partner with Callcentric to provide service for our ErisTerminal SIP phones," said Graham Williams, VP of Sales at VTech. "VTech's new and existing customers can now benefit from the wide range of value-conscious offerings provided by Callcentric."

Callcentric customers looking for an affordable, high-quality desktop IP phone solution will find it in VTech's ErisTerminal SIP phones. The phones offer HD audio, a comprehensive set of advanced call handling features, dual Ethernet ports, Power over Ethernet (PoE), cordless headset support, and much more.

For cordless applications, the VTech SIP DECT base station and cordless handset (VSP600), offers an affordable solution that can expand up to six users with additional ErisTerminal SIP-DECT cordless handsets (VSP601).

**About Callcentric** - Headquartered in New York City, Callcentric has been providing VoIP phone services since 2005. Callcentric's portfolio of enterprise-grade SIP trunking and cloud-based service solutions for business customers includes voice, fax, DIDs in over 50 countries, toll-free DIDs, and more. Callcentric is proud to be a longstanding holder of the BroadbandReports.com "Gold Award" (which is based entirely on customer reviews) and their services have consistently been reviewed by leading industry sites/publications as being "Best in Class" for quality, customer service, and overall value.
