VTECH ERISSTATION DRIVES A REVOLUTION IN AUDIO CONFERENCING

VTech ErisStation® conference phone with four wireless mics delivers superior workplace communication

BEAVERTON, Ore., Nov. 12, 2014 – Conference phones are ubiquitous in business meeting rooms today, enabling groups to communicate and collaborate. Conference call quality is often compromised because of background noise and interference, ultimately impacting productivity and impeding effective collaboration. The ErisStation® conference phone with four wireless mics from VTech® Communications Inc., a wholly owned subsidiary of VTech Holdings Limited (HKSE: 303), is the perfect solution for workplace communications, delivering superior voice quality and pickup range for any size room.

The ErisStation (VCS704, MSRP: \$599) features four, portable DECT 6.0 microphones with Orbitlink Wireless Technology™ that allow meeting participants to spread out and speak without having to raise their voices. Whether employees are right next to the phone or across the room, everyone will hear the conversation clearly. The four microphones sit in the compact ErisStation base for convenient storage, while a built-in charging station with magnetic bays powers the microphones so they are always ready for use. The wireless microphones also have up to eight hours of talk time and up to 70 hours of battery life to accommodate long calls.

Sound quality, one of the most important components to any conference phone, is top of the line for the ErisStation. Dynamic noise reduction (DNR) automatically eliminates distracting ambient noise for clear conversations. Computer fans and noisy ventilation systems in the background will no longer distract participants or muffle conversations. Echo cancellation, integrated digital mixing technology and an audio equalizer also contribute to the superior sound quality, ensuring every word of every call is heard.

“VTech is the global #1 manufacturer of cordless telephones – we know the communication technology space,” said Graham Williams, vice president, Business Phones Division, VTech Communications. “We’ve taken our expertise in delivering leading edge technology for the residential, Small and Home Office, and Hospitality markets, and are rapidly expanding into the business marketplace with innovative products like the ErisStation that address the specific needs and challenges of workplace communication. Now, the benefits of high-quality, affordable and feature-rich technology that VTech is known for are available to the business community.”

Notable features include a high quality, full duplex speakerphone with a large, backlit display, 50-name phonebook and 50-number caller ID history. VTech’s versatile conference phone delivers an array of additional features including:

- Conference phone with two fixed microphones and four removable, DECT 6.0 wireless microphones with Orbitlink Wireless Technology
- Compatibility with legacy analog phone lines for easy installation
- Compatibility with PBX with FXS (RJ-11)
- Wireless microphones with up to 70 hours of battery life and up to eight hours of talk time
- Advanced audio technology that avoids interference from mobile phones and other wireless devices
- Built-in magnetic charging bays in base, which keep wireless microphones powered up
- Advanced parts replacement with new, not refurbished, products
- Limited two-year warranty
- **List:** VCS704 is \$599 MSRP

About VTech®

VTech is the global leader in electronic learning products from infancy to preschool and the world’s largest manufacturer of cordless phones.
