

netsapiens Announces Certification of VTech ErisTerminal and ErisStation Product Lines for the SNAPsolution Unified Communications Software Platform

SNAPsolution platform offers improved mobility functionality with use of VTech DECT phones.

SAN DIEGO (August 2, 2017) – netsapiens, a provider of unified communications services and feature-sets to service providers and large enterprises, announces today the official certification of 11 VTech[®] ErisTerminal[®] and ErisStation[®] SIP phones. VTech Communications, Inc., a global leader and manufacturer of SIP-based phones, delivers full-featured products at accessible prices.

Certified VTech models include VSP505, VSP600, VSP601, VSP608, VSP715, VSP725, VSP726, VSP735, VSP736, VCS752, VCS754 and VH6102. These VTech phones enhance the flexibility and functionality of the netsapiens UC Call Control platform for both netsapiens service providers and end users.

“VTech is excited to partner with netsapiens to bring more SIP options to service providers and end-users,” said Ernie Levenson, president, VTech Communications, Inc., “Our ErisStation and ErisTerminal SIP phones can help improve business communications and increase productivity in the workplace.

netsapiens’ SNAPsolution platform provides service providers and large enterprises with the software they need to deliver unified communications services to their end-users. This includes hosted PBX, SIP trunking, call center features, mobile applications and more. The certification of VTech devices gives netsapiens’ clients another way to add more mobility to their offerings with the use of DECT phones. Unlike many business phones, VTech allows users to easily add a cordless handset to their deskset system without expensive lifters or complicated wiring. DECT 6.0 technology enables end-users to enjoy hands-free mobility and super-clear sound quality.

“We are pleased to announce the certification of VTech device compatibility with the netsapiens platform,” said Ken Adams, VP, Marketing and Partnerships. “Each of our clients has different needs depending on the markets that they serve. This partnership will allow our customers to have a wider selection of mobile endpoints to meet their end-users’ needs. We find it important to continue to work with forward thinking partners like VTech and expand our ecosystem offerings to our current and future customers.”

About netsapiens

netsapiens offers a comprehensive suite of unified communications (UC) services and feature-sets to service providers and large enterprise customers with existing network infrastructure. This includes VoIP, Hosted PBX (UCaaS), SIP trunking, contact centers, device provisioning, multi-tenant user portals and much more. Custom-built to provide its partners with unprecedented levels of flexibility, customization and ease of use, the SNAPsolution — UC and Collaboration tools — can be quickly deployed so that the company’s service provider partners can realize their ROI just as quick.
