VTech and Yeastar Partner to Deliver SMB Key Line Wireless Office Solution

Unique SMB solution combines VTech ErisTerminal VDP650 Cordless 4-Line Series and Yeastar S20 VoIP PBX

Beaverton, OR / **Xiamen, China** (October 29, 2018) – VTech Communications, Inc. a global leader and manufacturer of SIP-based VoIP phones, has partnered with Yeastar®, a leading provider of host- and premise based VoIP PBX to offer the only true key system emulation cordless VoIP solution for SMBs (small and medium-sized businesses) transitioning from analog to SIP communications.

Available today, the SMB Key Line Wireless Office is a solution like none other. End users receive off-the-shelf VoIP service, SIP cordless mobility and key system emulation. Easy to install, use and manage, the customizable solution includes the Yeastar S20 VoIP PBX and the VTech® ErisTerminal® VDP650 SIP DECT Cordless 4-Line Series phones.

S20 VoIP PBX

The S20 VoIP PBX supports both SIP and analog trunking, and delivers enterprise-grade telephony features: auto-attendant, voicemail, line status appearance, call parking, paging/intercom, time-based call routing, AutoCLIP, call recording and GSM/3G/4G expansion cards for mobile failover.

VDP650 SIP DECT Cordless 4-Line Series

The VDP650 cordless series includes a base station, cordless handset and cordless deskset with wireless (battery) functionality. Key system emulation enables employees to easily handle multiple calls, and always know which customers need attention. Both handsets and desksets have individual, backlit LED line keys, so users can view the status of incoming calls from any phone. Someone can place a call on hold with one button, and then retrieve the call from another device.

The SMB Key Line Wireless Office offers businesses key line simplicity, wireless mobility, and SIP telephony features they need to stay connected to their customers. This solution solves the problem of handling multiple calls in busy and diverse SMB environments. The solution also scales up or down when business needs change. End users will love simple provisioning from the base station, the ability to add up to 10 devices, DECT 6.0 technology, and up to 500 feet of mobility.
