

Vodia Certifies Interoperability with Snom SIP Phones

Vodia announces certification of Snom D7XX Series Product Line on Vodia Networks' IOP, IP-PBX and Hosted PBX platforms

BEAVERTON, OR / BOSTON, MA (June 4, 2019) Vodia Networks, a provider of leading-edge software based PBX for SMB and enterprise communications solutions, and Snom Americas, a leading manufacturer of professional and enterprise IP phones, have certified interoperability of the Snom D7XX Series SIP telephones with Vodia IO, Vodia IOP, PBX and Hosted PBX products.

The two companies have joined forces to provide enterprise customers and channel partners with reliable, cost-effective, and flexible communication systems. This new integration means rapid, easily managed deployments with the latest Snom Americas SIP deskset offering.

Comprehensive tests involved the interoperability of Vodia Networks' IOP, IP-PBX and Hosted PBX platforms. The platforms added the following four new D7XX Series models to Vodia's PBX solutions, resulting in successful interoperability and ease of configuration with both hosted and IOP PBX software:

Snom SIP Deskset Series:

- D785 SIP Color Deskset
- D735 SIP Color Deskset
- D717 SIP Color Deskset
- D120 SIP Deskset

"Our partnership with Vodia will help bring more affordable, complete telephony solutions to enterprise and service provider customers throughout the United States, said Brian Tompkins, vice president of sales, Snom Americas. "Vodia's leading edge IP-PBX software and the Snom product portfolio is the perfect combination to enable scalable, reliable and feature rich telecommunications support for channel partners who want to grow their business."

"Snom products are well known to us, and we're particularly excited about having this new D7xx series interoped on our system," said CEO Christian Stredicke of Vodia. "These new Snom phones allow the full features of our software to be realized while providing strategic benefits in cost, design, implementation and long-term management."

Cost-effective and easy to use, the Snom D7XX Series SIP desksets (D717, D735 and D785) seamlessly scale from small to enterprise businesses. Snom Americas backs the D7XX Series with North American based sales, technical and support teams, as well as industry-leading three-year warranties. These robust phones include customizable color LCD screens and dedicated feature keys to enable convenient call handling.

The Snom D785 SIP Color Deskset helps people manage and delegate calls on a daily basis. Employees can easily handle multiple calls via a 4.3-inch color LCD screen, 10 clear lines of

information and four soft keys. The D785 can also simultaneously support up to 12 SIP lines or accounts from a single setup. A second LCD screen gives users access to four pages of six self-labeling feature keys for instant access to programmable functions, eliminating the requirement for an additional side car deployment.

About Snom Americas

A leading premium brand for innovative professional and enterprise VoIP phones, Snom Americas provides a diverse collection of telecommunication products that elevate the business consumer experience through state-of-the-art technology and design. These business phones are sold through a wide network of trusted partners and are backed by industry-leading warranties and U.S.-based training and support. Snom Americas was launched in 2019, after the acquisition of the German VoIP leader Snom Technology GmbH by VTech Holdings Limited in 2016. The Snom Americas product line includes color desksets, cordless phones, headsets, wireless conference phones (coming soon) and public broadcasting systems.

Founded in 1976, VTech is the largest manufacturer of residential phones in the U.S. and the global leader in electronic learning products from infancy through toddler and preschool. It also provides highly sought-after contract manufacturing services. VTech's mission is to design, manufacture and supply innovative and high-quality products in a manner that minimizes any impact on the environment, while creating sustainable value for its stakeholders and the community.
