

### Phonesuite Certifies Interoperability with Snom D7XX Series SIP Phones

*Phonesuite announces certification and Zero Touch Provisioning of Snom D7XX Series Product Line on Version 3.1 of the Voiceware Communications Platform*

**BEAVERTON, OR / BROOMFIELD, CO (April 16, 2019)** Phonesuite, a leading manufacturer of premise and cloud telecommunications systems for hospitality and VTech Communications, Inc. (VTech), a global leader and manufacturer of SIP-based phones, have certified interoperability of the Snom D7XX Series of SIP telephones on Phonesuite Voiceware 3.1, releasing April 1, 2019.

The two companies have joined forces to provide the hospitality industry with reliable, cost-effective, and flexible communication systems. They can be installed with Zero Touch Provisioning for rapid, easily managed deployments.

In addition to VTech analog and SIP guest room phones, the interop adds the following three new Snom models, featuring color screens and paperless speed dials, to the Voiceware platform. This makes VTech the only telephone manufacturer providing guest room phones, administrative phones and conference phones on the same platform. The following Snom and VTech products are available in Phonesuite Voiceware 3.1:

#### Snom SIP Deskset Series:

- D785 SIP Color Deskset
- D735 SIP Color Deskset
- D717 SIP Color Deskset

#### VTech Hospitality Telephones:

- LS-3410 SIP Color Cordless Guest Room Phone
- S2XXX Series Contemporary SIP Cordless Guest Room Phones

Cost-effective and easy to use, the Snom D7XX Series SIP desksets (D717, D735 and D785) seamlessly scale from small hotel offices to hospitality call center businesses. VTech backs the Snom D7XX Series with North American based sales, technical and support teams, as well as industry-leading three-year warranties. These robust phones include customizable color LCD screens and dedicated feature keys to enable convenient call handling. Zero touch provisioning allows for easy installation.

The Snom D785 SIP Color Deskset helps people manage and delegate calls on a daily basis. Employees can easily handle multiple calls via a 4.3-inch color LCD screen, 10 clear lines of information and four soft keys. The D785 can also simultaneously support up to 12 SIP lines or accounts from a single setup. A second LCD screen gives users access to four pages of six self-labeling feature keys for instant access to programmable functions, eliminating the requirement for an additional side car deployment.

Business Solutions

“Our partnership with Phonesuite will help bring more affordable, complete telephony solutions to full-service, select-service and value brand hotels throughout North America and the Caribbean,” said Chad Collins, vice president of sales, Americas, VTech Communications. “Phonesuite Voiceware, VTech guest room phones, Snom admin phones and conference phones can help meet more hotel communication needs with less vendors and better support.”

“The Snom series of phones are the latest VTech products to be certified on Voiceware,” said Frank Melville,” President of Phonesuite. “The VTech and Snom administrative, conference and guest room phones in Zero Touch Provisioning allow the full features of the Voiceware platform to be realized while providing strategic benefits in cost, design, implementation and long-term management.”

#### **About VTech**

VTech provides a diverse collection of telecommunication products that elevate the business consumer experience through state-of-the-art technology and design. The Group’s business phones scale from small operations to enterprise-level corporations. They are sold through a wide network of trusted partners and are backed by industry-leading warranties and U.S.-based training and support. In 2016, the company acquired German VoIP leader Snom, and recently launched Snom Americas, a branded suite of high-quality SIP business communication solutions. The Snom Americas product line includes color desksets, cordless phones, headsets, wireless conference phones (coming soon) and public broadcasting systems.

Founded in 1976, VTech is the world’s largest manufacturer of cordless phones and the global leader in electronic learning products from infancy through toddler and preschool. It also provides highly sought-after contract manufacturing services. VTech’s mission is to design, manufacture and supply innovative and high-quality products in a manner that minimizes any impact on the environment, while creating sustainable value for its stakeholders and the community.
